No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 25,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    rat tumor necrosis factor receptor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               tumor necrosis factor receptor 1 precursor - rat

N'Contains: tumor necrosis factor binding protein 1 (TNF blocking factor)

Cispecies: Rattus norvegicus (Norway rat)

Cipate: 30-Jun-1992 #sequence_revision 07-Oct-1994 #text_change 09-Jul-2004

Cipacession: 836555

Rithimmler, A.; Maurer-Fogy, I.; Kroenke, M.; Scheurich, P.; Pfizenmaier, K.; Lantz, M.; Onk Cell Biol. 9, 705-715, 1990

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A;Cross-references: UNIPARC:UP1000016ADDE; GB:M21621; NID:g189206; PIDN:AAA36363.1; PID:c
C;Comment: This receptor is found on sensory and sympathetic neurons, on neuroblastoma cc
C;Comment: The cysteine-rich region of the extracellular domain may form part or all of tl
C;Comment: This protein is thought to form a high-affinity receptor when it associates will
C;Comment: This receptor undergoes both N- and O-linked glycosylation.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               receptor; ti

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Name=10; Synonyme=LARD-9;
Name=10; Synonyme=LARD-9;
Name=11; Synonyme=Beta;

IsoId=Q93038-10; Sequence=VSP_006503;
Name=11; Synonyme=Beta;

IsoId=Q93038-11; Sequence=VSP_006496;
Name=12; Synonyme=Beta soluble;
Note=May be produced at very Tow levels due to a premature stop codon in the mRNA, leading to nonsense-mediated mRNA decay;

Inymphocytes. Detected in lymphocyte-rich tissues such as thymus, colon, intestine, and spleen.

Inymphocytes and spleen.

Intestine, and spleen.

Intestine, and spleen.

Intestine and spleen.

Intestine at death domain.

Intestine at the prostition 208 a serine residue instead of arginine.
                              SUBDIVIT: Homodimer. Interacts strongly via the death domains with TNFRST1 and TRADD to activate at least two distinct signaling scascades, apoptosis and NF-kappa-B signaling. Interacts with BAG4. SUBCELLULAR LOCATION: Type I membrane protein (1soforms 1, 2, 9 and 11); Secreted (1soforms 3, 4, 5, 6, 7, 8, 10 and 12)
                                                                                                                                                                                                                                                                                                                                                                                                                                               stop
                                                                                                                                                                       premature stop
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            induces apoptosis. May play a role in regulating lymphocyte
                                                                                                                                    (FORENTIAL).

Event-Alternative splicing; Named isoforms=12;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Genomic_DNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Genomic_RNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            mRNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         mRNA.

similarity).
SUBCELLULAR LOCATION: Type I membrane protein.
SUBCELLULAR LOCATION: Type I membrane-proximal region and the C-terminal region containing the death domain are involved in the interaction with TRPCAAP (By similarity).
SIMILARITY: Contains I death domain.
SIMILARITY: Contains 4 TNFR-Cys repeats.

RIP and possibly FADD, are recruited to the complex by their association with TRADD. This complex activates at least two distinct signaling cascades, apoptosis and NP-kappa-B signaling Binds BAG4. Constitutively associated with TRPC4AP (By
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Pfam; PF00531; Death; 1.
